Older Child Circumcision Post-Procedure Care

1. Your son will go home with a bandage wrapped around his penis. Do not try to re-wrap it in the first 24 hours. If the bandage falls off, leave it off.
2. On post op day 3, we will remove your son's bandage.
3. For two weeks after the procedure you need to apply Vaseline three times a day on the penis, either directly, or by applying Vaseline onto a piece of gauze and then placing it over top of the penis.
4. Your son should not shower for 5 days.
5. Your son should try to avoid any vigorous activities.
6. Your son should take both Panadol and ibuprofen 3 times a day for the next 5-7 days. Use the dose indicated on the bottle for his age.
